veriTAG signs Tivo Technologies Pte. Ltd. as a distributor for Singapore

Tivo Technologies, a trusted distributor and IT support services provider in Singapore is now a veriTAG partner.

Their team of experienced and qualified sales professionals, technicians and engineers, provide a comprehensive range of professional, high quality services and an industry leading level of sales and technical support to their clients, across all sectors, which include several Singapore Government Ministries and Statutory Boards. Their strong network includes resellers, system integrators and channel partners.

The products they market and support include those from Fluke Networks, Raritan, Tandberg Data, NVIDIA, Promise Technology, Veritape and KEMP Technologies.

Their services portfolio, include network, security, systems, storage, infrastructure, projects, facilities, relocation and deployment.

In their business, quality and reliability of products in use, means everything for them and their customers, and such a reliable solution to reputable clients, instills confidence and helps foster a long-term business relationship.

Using veriTAG to tag, authenticate, track and audit their products in use, at customer locations, ensures that products are properly checked, maintained, accounted for, and audited.

veriTAG is a unique patented technology that uses a combination of smart tags, mobile and cloud technology, and is used by companies in many industries, to ensure that products can be tagged, distributed, sold and serviced in a manner that is secure, verifiable and auditable.

veriTAG Pte. Ltd. has its headquarters in Singapore, with offices in China and Canada, and partners in several other countries globally.
